AMERICAN INTERNATIONAL UNIVERSITY-BANGLADESH

A PROJECT ON STUDENTS MANAGEMENT SYSTEM

04/12/2021

OVERVIEW

In our modern generation we all are able to use devices. Then why it will lag behind in education. That's why we made a portal type application for our honorable school, college or university administration. Who can easily manage student information and all. In the meantime, he/she can search specific student details. Our application creates a hassle-free data saver because when entering information by hand is often wrong sometime at the same time that will to much problematic for searching a student detail.

High-Level Requirements

The new system must include the following:

- Ability to allow both internal and external users to access the application without downloading any software
- It's a windows desktop application
- To welled manage students documents in a server or portal

Features of our project

Mainly there are three features in our project. There are so many parts to these features that will help admin to work in an orderly manner. our features are:

- WELCOME PAGE
- LOGIN
- STUDENT
    1. Registration
    2. Manage student
    3. Status
    4. Print student list
- COURSES
    1. Add course
    2. Manage course
    3. Print course list
- SCORE
    1. Add/edit score
    2. Manage score
    3. Print score list

- DASHBOARD
- LOGOUT

Implementation Plan

We implement this application in Microsoft visual studio. By implementing this application our honorable university teachers can add /manager details of a student easily .as like as their information, course, score etc. Admin can change student details (add/remove student, course, score etc.)
